

MIGUEL FERNANDEZ

BS. COMPUTER SCIENCE

Carrollton, TX | (469) 758-7608 | asteriofinol@gmail.com | miguelafernandezf.com

Versatile developer and recent Computer Science graduate with comprehensive experience across both frontend and backend domains. Leveraging a strong foundation in TypeScript, React, Next.js, and PostgreSQL, I build scalable, end-to-end applications. Beyond traditional software engineering, I specialize as an AI developer, combining academic experience in AI development and data analysis with hands on expertise in seamlessly implementing AI into modern tech stacks. I am excited to bring my adaptability and technical drive to a competitive engineering team.

SKILLS

Languages: TypeScript, JavaScript, Python, Java, C++, SQL, HTML5, CSS3.

Frontend: React, Next.js, Tailwind CSS, Vite, React Native, responsive & accessible UI.

Backend & Data: Node.js, Express, FastAPI, Supabase, PostgreSQL, REST API design, Clerk.

Tools & DevOps: Git, GitHub, Docker, Vercel, Postman, Figma.

Soft Skills: Fluent Spanish/English, Teamwork & Collaboration, Client Communication, Cross-Functional Coordination, Agile Environment Adaptation.

PROJECTS

Bip Bip Driving School — Bilingual Driver Education Platform

bipbipdrivingschool.com

Next.js · React · TypeScript · Tailwind CSS · Supabase (PostgreSQL)

- Developed a responsive, fully bilingual, English and Spanish versions, web application using React and Tailwind CSS to host online driver education courses, ensuring the frontend strictly met client design specifications.
- Implemented a robust backend logic via Next.js API routes and Supabase (PostgreSQL) to enforce Texas Department of Licensing and Regulation (TDLR) compliance regulations, thus preventing skipping ahead in the curriculum and ensuring student engagement.
- Developed a secure admin dashboard with Role-Based Access Control (RBAC) and complete database access, allowing the staff to manage student progression, while also allowing them to organize and export data for TDLR audits.

The Review Mediator

TypeScript · React · Express · Supabase (PostgreSQL) · Clerk

- Collaborated with a UTD student engineering team to develop a full-stack capstone platform that enables businesses to track, manage, and file disputes over online reviews.
- Developed secure, authenticated API endpoints with Express and Clerk that seamlessly linked the React-based user interface to a Supabase PostgreSQL database to manage and track dispute records.

EXPERIENCE

Bilingual Receptionist — Tax Mart

Dallas, TX · Feb 2025 – May 2025

- Served as the English/Spanish bridge between clients and staff, translating in person and making sure Spanish-speaking customers understood the services they were signing up for.
- Maintained confidential client records and verified filing paperwork for accuracy before submission, working under company privacy policy.

EDUCATION

B.S. in Computer Science — The University of Texas at Dallas, Richardson, TX

2024 – 2026

A.S. in General Studies — Collin College, Plano, TX

2022 – 2024
